

TCPOS.net Helps Keep Time in Japan & China

Luxury watch maker F.P. Journe was looking for an EPOS solution for its boutiques in Hong Kong, Tokyo and Geneva.

F.P. Journe wanted to invest in a system that provided the business with a solution that would be tailored to their requirements, rather than one that was standardised.

TCPOS.net from TCPOS SA was able to meet the business requirements being sought which included; extended character support to support both Japanese and Chinese as well as providing a multi-lingual interface for the boutique staff whilst also being able to facilitate local currency and tax requirements.

The database, which is located in Geneva, communicates via ADSL in real-time to the Points of Sale in each boutique.

A further requirement that F.P. Journe had was that the chosen EPOS solution needed to interface into their existing ERP package (ProConcept ERP). An interface was developed by TCPOS SA, enabling customer details to be recorded and viewed either centrally or locally, but also enables the administration of warranty and product serial numbers at the Point of Sale.

Advantages of TCPOS.net

- Invoice Printing via A4 Laser Jet
- Multi-Lingual and Currency Support
- Centralised Database
- Interface into ProConcept ERP
- Comprehensive Reporting - Business Intelligence Module

F.P. Journe is a high-end watchmaker of Switzerland.

The motto of the brand, Invenit et Fecit (Latin for "Invented and made") denotes that the company builds the entirety of the watches. Journe often designs brand new movements, even inventing completely new systems, like the resonance chronometer. All the F. P. Journe watches are available around the world thru the boutiques or authorized retailers. Website - www.fpjourne.com
